

printOp_goto_w

read< uint32_t >

read< uint8_t >

```
graph LR; A[printOp_goto_w] --> B[read< uint32_t >]; B --> C[read< uint8_t >];
```

The diagram illustrates a sequence of three operations connected by arrows. The first operation, 'printOp_goto_w', is contained within a gray rectangular box. An arrow points from this box to a white rectangular box containing the second operation, 'read< uint32_t >'. A second arrow points from this box to a final white rectangular box containing the third operation, 'read< uint8_t >'.
