

printOp_goto

read< uint16_t >

read< uint8_t >

```
graph LR; A[printOp_goto] --> B[read< uint16_t >]; B --> C[read< uint8_t >];
```

The diagram illustrates a sequence of three operations connected by arrows. The first operation, 'printOp_goto', is contained within a gray-shaded rectangular box. An arrow points from this box to a second, white rectangular box containing the text 'read< uint16_t >'. A second arrow points from the second box to a third, white rectangular box containing the text 'read< uint8_t >'. All boxes have a black border, and the arrows are dark blue.
